Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            22:35:04 ; Search time 115.091 Seconds (without alignments)

SUBUNIT: eIF4F is a multi-subunit complex, the composition of which varies with external and internal environmental conditions. It is composed of at least EIF4A, EIF4B and EIF4Al or EIFA2, Interacts with eIF3, mutually exclusive with EIF4Al or EIFA2, EIF4E and through its N-terminus with PAPBG1. Interacts through its N-terminus with PAPBG1. Interacts through its N-terminus with PAPBG1. Interacts through its SC-terminus with the serine/threonine kinases MKNK1, and with MKNK2. Appears to act as a scaffold protein, holding these enzymes in place to phosphorylate EIF4E (By similarity).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Lamphear B.J., Yan R., Yang P., Waters D., Liebig H.-D., Kl Kuechler E., Skern T., Rhoads R.E.;

CC -i- FUNCTION: Component of the protein complex eIF4F, which is involved in the recognition of the mRNA cap, ATP-dependent of unwinding of 5'-terminal secondary structure and recruitment of mRNA to the ribosome (By similarity).

CC -i- SUBUNIT: eIF4F is a multi-subunit complex, the composition of the subunit complex, the composition of the subunit complex and EIF4G1/EIF4G3.

CC It is composed of at least EIF4A, EIF4E and EIF4G1/EIF4G3.

CC It is composed of at least EIF4A, EIF4E and EIF4G1/EIF4G3.

CC EIF4E and through its N-terminus with PAPBC1. Interacts through the CC its C-terminus with the serine/threonine kinases MRNK1, and with place to phosphorylate EIF4E. Non-phosphorylated EIF4EBP1 competes with EIF4G1/EIF4G3 to interact with EIF4G1/EIF4G3 to interact with EIF4G1/EIF4G3 to interact strate insulin stimulated MAP-kinase (MAPK1 and MAPK3) phosphorylation of EIF4G1/EIF4G3 to bind and consequent initiation of translation (By similarity).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          RA Okazaki Y., Furuno M., Kasukawa T., Adachi J., Bono H., Kondo S.,

Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                     B B
